NEW U. S. PATENT PROCESS DWARF-SIZE TREES

Stark's Amazing New Dwarfs Grow "GIANT SIZE" Fruit In Even the Tiniest Back Yards!

Stark Hardy Dwarf Trees Can Be Planted 8 to 10 Feet Apart

"What could be more fun than picking fruit from your own trees? Flavor-filled fruit that's not picked while still hard so it will ship well, but perfect fruit that's ripened on your trees, getting sweeter and sweeter? What could be more satisfactory than growing Summer, Fall and Winter Apples this way? And your choice Pears and Quinces?"

"Plant Dwarf Trees and you can have all the fun. Big juicy apples and pears on little trees you can fit into half a dozen spots without trouble. Plant several varieties of Dwarf Apples and you get family-size crops from different varieties ripening over several months." And you, too, can know the joys of your own delicious tree-ripe fruit — even if you have just a tiny back yard.

Fruit Just As Big—Just As Delicious

It's amazing, but the Apples and Pears grown on Stark Hardy Dwarf Trees are just as large, just as beautifully colored, just as deliciously flavored and just as fine in every way as the same varieties grown on regular trees.

Bear Even Quicker—Some varieties, such as Stark Golden Delicious, give some fruit at 2 years.

STARK NEW HARDY DWARF TREES

Our EXCLUSIVE New Propagating PROCESS Protected by U. S. PATENT!

Plant Them 8 to 10 Feet Apart

All Stark Dwarf Apple Trees are grown on the new Hardy Clark Dwarfing Stock developed by the late Dr. T. J. Maney and associates at the Iowa State College. Starting with this new Hardy Dwarfing stock, Stark Bro's have perfected a U. S. Patent Propagating Process which brings Hardy Dwarf Trees at reasonable prices. Stark Dwarf Trees are so HARDY they thrive wherever standard-size apple trees grow; so STURDY they need no staking or bracing; so SMALL they are ideal for Garden or Shrub Border and are now offered to you in a selection of favorite varieties listed in Ripening Order — at right.
